Welcome to iMeta

Finding The Talent In You

iMeta Training was founded in 2023 in Birmingham with a simple mission: create accessible, high-quality training opportunities for everyone, no matter your starting point.

Our small team of tutors, learner support staff, employment and recruitment officers and operations experts have decades of experience in adult education. We recognise and remove the barriers that many adults face in the West Midlands, from financial hardship to childcare difficulties, to managing neurodivergence and addressing confidence and self-esteem.

We deliberately provide opportunities to train in fast-growing sectors, ensuring that learners have clear pathways for progressing their careers and education after they complete their course. 8 out of 10 of our learners move onto new jobs in their chosen field, secure a promotion, or continue into further education at university or through an apprenticeship.

After succeeding in our mission in our hometown, we have made the exciting choice to offer our services to the rest of the UK, providing self-funded opportunities that offer the flexibility, affordability and quality that hard-working people need to continue their professional development.

Every part of the iMeta learning journey is designed so no learner is left behind. We find the talent in you.

What We Stand For

We're here to make learning more accessible, more relevant, and a whole lot more human. These are the values that guide everything we do.

Making Learning More Enjoyable

Training should feel motivating. We design our courses to be practical, engaging, and focused on real-life outcomes, so you actually enjoy learning and want to keep going.

Staying on the Pulse of Business Technology

We keep up with the latest tools, trends, and tech so our learners stay ahead of the curve. From digital skills to industry-specific know-how, we've got it covered.

Keeping Brum in Business

We're proud to be based in Birmingham and even prouder to support local people and businesses. Whether you're in Brum or beyond, we're here to help you grow and thrive.

Encouraging Personal and Professional Growth

We go beyond teaching technical skills by fostering soft skills like critical thinking, collaboration, and problem-solving. We want our graduates to be confident and capable of taking ownership of their careers in technology.

Frequently Asked Questions

Who should take the combined Foundation + Practitioner course?

This course is ideal for anyone looking to start or formalise a career in project management. It's especially suited to professionals transitioning into project roles, team leads wanting to step up, or those seeking a structured project management approach that's recognised across industries.

Are both exams included in the cost?

Yes, both the Foundation and Practitioner exams are included in the course fee. There are no additional costs for certification.

What roles will these qualifications help me apply for?

With PRINCE2® Foundation and Practitioner certifications, you'll be well positioned for roles such as Project Coordinator, Project Manager, Junior Project Manager, Programme Assistant, or Project Support Officer. These qualifications also strengthen your CV for roles involving planning, delivery, or oversight of business projects.

What's the difference between Foundation and Practitioner?

The Foundation level introduces you to the core principles, terminology, and structure of PRINCE2®, giving you a solid theoretical base. The Practitioner level builds on that by showing you how to apply and tailor the method in real projects, helping you manage delivery with confidence and structure.

Do I need any experience to enrol?

No prior project management experience is required. The course is designed to take you from foundational knowledge to applied understanding, making it accessible whether you're starting out, reskilling, or formalising existing experience.

How does PRINCE2® compare to Agile or PMP®?

PRINCE2® is a structured, process-based methodology that focuses on governance, control, and clear project roles. Agile is a flexible, iterative approach often used in software or fast-changing environments. PMP® (from PMI) is a broader, globally recognised certification with a focus on U.S. standards and a deep dive into project knowledge areas. PRINCE2® is often preferred in the UK and Europe and can be effectively combined with Agile or PMP® depending on your career goals.
